It should be noted with pride that the exemplary life and work of our great scholars, thinkers, and the unparalleled scientific and creative discoveries that have lived on our land amaze the people of the world even today.^[9]

Islam Karimov - the first president of the Republic of Uzbekistan.

Annotation: *This article reflects on the teachings of our great scholar and thinker grandfather Ahmed Donish, who lived on our land. Our greatest goal is to guide the next generation to choose a profession based on the unique teachings of the thinker and the content of his work "Nawadir-ul-Waqae".*

The works and cultural-spiritual heritage of the original children of our people deeply reflected the meaning and essence, complexities and conflicts of the complex era in which they lived and created. By reading artistic and philosophical works, stories, moral collections, theoretical and prose letters, epics, memoirs, which are a part of our national-spiritual wealth and are a scientific and cultural heritage from enlighteners, we will learn about the dreams, history, spiritual-educational, moral views of our people we will find out.

Key words and concepts: *Man and humanity, manners, education, elders, great scientists, teachings, techniques and technologies, the Universe, enlightenment, spirituality, spiritual-enlightenment, moral views.*

The words of the President of the Republic of Uzbekistan Sh.M. Mirziyoev in his address to the Oliy Majlis and the people of Uzbekistan: "Increasing the quality of education is the only correct way of development of the new Uzbekistan"^[10] - always resonate.

At a time when man and mankind, the whole Universe, are tearing up the surface of the Earth, slicing it into its bosom, mastering the surface of the

Earth, sifting through the main part of it, making huge discoveries with a lot of knowledge, inventing new techniques and technologies, and using them, such a beautiful At this time, when the nature, the heavenly Mother Earth, is being brutally robbed, there is a need to review its past. By reminding him of the folk wisdom of "who we were, who we have become", we should look for answers to the questions of who we will be in the future and what will happen in our history and the foundations of our ancestors' education.

What is left, the man who did not get dirty, the bell, the healing water, the extent to which we breathe fresh air into poison, forgets his faith and faith, even, despising his mother, humiliating his father, looking at his father with greed, some compatriot with ignorance of the inner world, the time has come to remind the messengers of the situations of our ancestors. Therefore, the lesson of the enlightened as Ahmad Wise is the first vital need. From the "Avesto" to Ibn Sina, the need to feel, not to forget, even if the Rings of the chain of life from him to today are one-slapped, is always in our minds. It is our duty to keep our minds Pure at all times and to fill them with our great Pires, our great allomas, their will-he exhortations.

Such a great and great, one of the representatives of our purma spiritual heritage, co-founder Ahmad Donish is the owner of features, worldviews, ideas, teachings that are fostered by the Bukhara enlightenment. He leaned on his people, his protagonist is also a people, he stood on the side of the people with all his being, he fought for the well-being and freedom of the people who defended the interests of his people and sang that, the ruling classes, a brave, brave man who exposed even the King's indenture, revealed the socio-political system of his time and The key to wisely establishing production in order to progress the country – not returning from repeated attempts to start with reforming the school and educational sphere, believes that the alphabet of alloma reforms is education and upbringing.

In this regard, it has been noted many times that wherever Ahmad Donish was active, on whatever front, the madrasa was always considered the greatest, most sacred for him.

Ahmad Wise is the wealth of the people's spirituality, it is necessary to practice reading it in order to achieve it. At this point, the question arises: "Why are we deprived of this spiritual heritage?" It is worth answering this question in the voice of baralla, whose ideas, teachings save everyone, first of all, the people of Science from ignorance, and society from ignorance.

Ahmad Donish says, "the stewards we call Alif or Mr. Wazir are like moles, even more misguided. If he listens to Sharia, they should be repelled

every hour. No one should listen to them and follow their orders. For this, no one will be a rebel and a spoiler. Management should be based on justice, if it is based on violence, it is the caliphate of Satan, damn it! Most surprisingly, these words are sealed curses. These words are printed a hundred times and more and decrees every day, but, no one knows the content. "[11]

There is no other word than to say thank you and "tasanno", these words are said towards Ahmad Donish's own time, towards the rulers, in which a deep and broad meaning is embodied, this is a miracle and the magic of the word. These words of Ahmad The Wise, which are permeated with eternity, feed on pure hearts. He lived, literally lived, promoted justice, purity, purity, honesty, science. Did not live in vain, left a huge spiritual legacy, laid the foundations of Education, created educational and teaching reforms and teaching, followed it, it is a symbol that will be taught if he takes lessons, it is like a sacred lesson, the doctrine of genius is a universe.

The lessons of Ahmad Donish are characteristic and appropriate for all times and times, he is always a novelty. He is the grandfather teacher, Piri, the first teacher of the bukharians. If wisdom is learned by his successors, there will be a very great reward and an intellectual person. The doctrine of wisdom is a chain between man and man, as long as it is a chain, an unbreakable, strong chain. This connection and the discrepancy between are scientifically and philosophically based.

The connection of human abilities and potential, human qualities and qualities, is a scientific statement of its content and essence. The Humane thinker is an artistic pedagogical scientist who is able to express the role and place of upbringing in the processes of formation of the younger generation, whether it is good or bad, and be beautiful.[12]

Ahmad wise's greatness and ingenuity in the world of Science, in literature is that, reflecting on an event, phenomenon and expressing his statement, he concludes his ideas not only in prose, but also in a poetic way, using folk Proverbs, narratives, narratives, which indicates that he is the owner of a unique ability.

Ahmad Donish is a huge artistic writer-poet, whose adventures called "The Adventures of Mullah Holmat about the benefits of a story (Travel) told by a pilgrim" are a rare and unique work of purely educational importance from beginning to end, an excellent historical resource, in which the importance of science, this story is a moral figure. The most vivid

embodiment of the pedagogical teaching of Ahmad Donish is embodied in the "Navadir-ul vaqoe", in the same work is the exhortation or testament of the great educator to children, to future generations. His shelves about the upbringing of the perfect generation were so polished.

This teaching should be studied by every teacher-teacher, in particular, every person who says that I am a teacher in our country, a teacher-teacher, that he learns his pedagogical views (teachings) is both debt and farce, otherwise he will remain ignorant of pedagogy.

Reading the pedagogical teaching of Ahmad Donish-a person who gave birth will have a national idea of what a harmonious generation should be like.
