

UZBEKISTAN - COUNTRY OF YOUTH

Kilichova Iymona Poyon kizi

*1st year student of International Relations Faculty of Tashkent University
of International Financial Management and Technologies*

Abstract: *It is known from the historical development of any country that the rapid development of the country, the achievement of certain achievements, and the well-being of the people depend on the level of attention paid to the education and future of the youth in that country. In this sense, the issue of youth in Uzbekistan is one of the most priority areas of state policy.*

Young people are considered an important social layer that determines the future and potential of every country. After all, the state, fate and prospects of every society are determined by the weight, spirituality and level of consciousness of the young people living in it. Young people are the tomorrow's future of the society, its active members, so to speak, the worthy heirs of the society's tomorrow. According to this point of view, young people are constantly under the attention of the state and society.

Key words: *Youth, future, creativity, history, perfect person, political stability, President and youth, state policy, national idea, world community, legal literacy, spirituality, moral courage, purpose, young generation, reading, high intelligence, ancestors.*

Young people are the future of any society. Literally, they are the greatest wealth, priceless treasure of Uzbekistan. After all, the youth of new Uzbekistan is the foundation of our future and prospects.

At the root of the disturbances observed in a number of countries of the world, it is possible to see the consequences of the state's inattention to the growing youth, their interests in life, their rights and interests, and the inability of their youth policy to respond to the new threats of the present time. In such countries, it can be observed that there is a disconnection between the state and the youth. Therefore, it is appropriate to effectively organize the education of young people, to create a basis for them to use their free time effectively.

It is no coincidence that Shavkat Mirziyoyev, the President of the Republic of Uzbekistan, in his address to the Oliy Majlis, put forward the idea that "New Uzbekistan starts from the threshold of the school, from the educational system." Already, as our head of state noted, "If we can combine the knowledge and experience of the older generation, the qualities of foresight with the

enthusiasm, courage and selflessness of our youth, we will definitely reach the desired goals."

From this point of view, today the deputies of the Legislative Chamber of the Oliy Majlis are actively working to ensure the implementation of the priority tasks stated in the Petition. In particular, after this historic speech, a series of events dedicated to the content and importance of the Petition were held in the lower house of the parliament.

The issue of educating our youth, who are the future of our country, as mature, knowledgeable, potential individuals, perfect human beings is being approached today in a unique way, on the basis of modern methods. .

After all, our country is a country of happy young people, about 64% of the population of our country are young people, that is, people under 30 years old. Of course, if we bear in mind that this is a huge responsibility for our state, it requires a lot of attention and care. Because now more than half of Uzbekistan's labor resources are young people. In the future, every third leader will be young people.

That's why young people have always been recognized as an active layer of society. During the Eastern Renaissance, the role of youth was incomparable in the activities of the moderns and in the renewal of society. In this regard, this layer, which is formed regularly, requires constant guidance and support... This means that the state should take measures aimed at creating optimal conditions and opportunities for free socialization and effective self-expression of young people in the interests of the

country, as well as measures aimed at supporting young people. system refers to the state policy regarding youth.

Even in his speech in front of the world community, our honorable President promoted the state policy on youth!

The future and well-being of our planet depends on how our children grow up to be human beings. Our main task is to create the necessary conditions for young people to show their potential.

President of the Republic of Uzbekistan Shavkat Mirziyoyev
of the UN General Assembly

From his speech at the 72nd session

A strong legal framework has been created in the country to protect the rights and interests of young people, to create the necessary conditions and opportunities for them, and this system is being improved in line with the requirements of the times. In particular, more than 40 legal documents related to youth have been adopted by the parliament, and more than 30 international legal documents have been ratified.

Taking into account that we are living with the largest group of young people in the history of mankind, President Shavkat Mirziyoyev's proposal to adopt the UN Convention on the Rights of Youth was also warmly welcomed by the international community. Based on this, the head of Uzbekistan justified the fact that today the number of young people in the world has exceeded two billion, and the need to protect young people at a time when international terrorism and extremism are growing rapidly, as important factors.

The first legal document signed by Shavkat Mirziyoyev as the President of the Republic of Uzbekistan is the Law "On State Policy Regarding Youth" of September 14, 2016. Therefore, in a country where more than half of the population consists of young people, it is necessary to consistently implement the state policy on youth, to make the young generation mature and mature in all aspects, with intellectual potential, who has a firm position, and is indifferent to the reforms implemented in the country. The head of the country and the government are well aware that educating people who are ready to contribute to the future of the country, goal-oriented, energetic, patriotic, loyal, and perfect individuals is an important factor for Uzbekistan to become one of the most developed countries in the world.

In short, the state policy on youth in Uzbekistan is being pursued consistently, based on step-by-step, complex measures, with specific goals in mind.

As a result of the above-mentioned reforms, our great ancestors Amir Temur, Mirzo Ulugbek, Alisher Navoi, well-educated young people are prepared to be active in the management of society and the state. Mirza Ulug'bek, as a wise ruler of the Movarunnahr region for almost forty years, showed great courage and perseverance in the pursuit of the eternal dream of the people - peace, harmony, development of science and culture, and contributed to the formation of the spiritual world of the Uzbek people. We know the great Alisher Navoi's works and his creativity, whose verse had a strong and effective influence, and Amir Temur, who united many nations under one idea.

If we consider patriotism as a person's love, first of all, for his mother, and his mother is this Motherland. That's why this concept means a person's love for his Motherland and his desire to preserve it. Our forefathers, great-grandfathers and scholars have left us a legacy of great examples in history of expressing their loyalty to the Motherland and their love for their country. For example, our great thinkers such as Ahmad Farghani, Muhammad Khorezmi, Imam Bukhari, Imam Termizi, Abulays Samarkandi, Burkhaniddin Marginani associated their nicknames with the land where their umbilical cord blood was spilled, and their names are known to the world. We are well aware of what

made him famous. As you read their rich legacy, Benhoya will stir your heart to feel the feelings of patriotism.

Summary:

The attention and care paid to young people in our country is the most priority direction of our country's policy. Achievements and achievements in every field are a clear expression of this care and support. It is the sacred duty of every child of Uzbekistan to live with the feeling that they have a stake in the fate of the country and to make good use of the opportunities given to them.

I am sure that the people and the state, whose children are always in search and aspiration, aiming for high goals and moving forward, will definitely achieve the goals they have set for themselves. Because such actions are a powerful wave tomorrow

turning our lives from yesterday to tomorrow

better and better than today, ongu

leads to the elevation of our thinking.
